Quality Improvement Plan

(Short Form)

Renfrew Victoria Hospital

April 2011

This document is intended to provide public hospitals with guidance as to how they can satisfy the requirements related to quality improvement plans in the *Excellent Care for All Act, 2010* (ECFAA). While much effort and care has gone into preparing this document, this document should not be relied on as legal advice and hospitals should consult with their legal, governance and other relevant advisors as appropriate in preparing their quality improvement plans. Furthermore, hospitals are free to design their own public quality improvement plans using alternative formats and contents, provided that they comply with the relevant requirements in ECFAA, and provided that they submit a version of their quality improvement plan to the OHQC in the format described herein.

Part A:

Overview of Our Hospital's Quality Improvement Plan

Purpose of this section: Quality Improvement Plans (QIPs) are, as the name suggests, all about improvement. They are an opportunity for organizations to focus on how and what to improve, in the name of better patient-focused care. As such, they will be unique documents, designed by, and for, each individual organization. Overall, a QIP should be seen as a tool, providing a structured format and common language that focuses an organization on change. The QIP will drive change by formalizing a plan and facilitating shared dialogue to support continuous quality improvement processes. This introductory section should highlight the main points of your hospital's plan and describe how it aligns overall with other planning processes within your organization. In addition, this section provides you with an opportunity to describe your priorities and change plan for the next year.

Please refer to **Appendix D** in the QIP Guidance Document for more information on completing this section.

1. Overview of our quality improvement plan for 2011-12

[A general statement (100 words maximum) that is inspiring and situates the objectives within the Vision, Mission and Values of your organization]

The Renfrew Victoria Hospital quality improvement plan focuses on specific areas identified for improvement next year. The strategic priorities, mission, vision and values provide direction to the delivery of quality services. The plan is aligned with the hospital's four key strategic directions (below), with an emphasis on the provision of quality health care services.

- Quality Care
- Strength in People
- System Integration
- Financial Performance

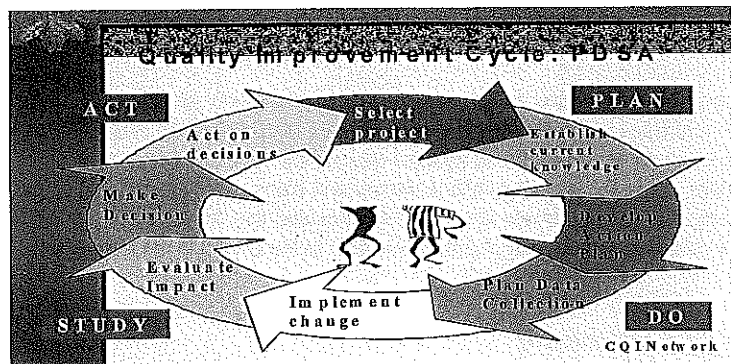

The plan is based on priorities identified by the Continuous Quality Improvement Committee of the Board, Senior Management team, care teams and aligns with accreditation standards and recommendations. The Renfrew Victoria Hospital focuses on a balanced scorecard approach with key improvement initiatives in the areas of safety, effectiveness, access and patient-centered care.

2. What we will be focusing on and how these objectives will be achieved

[A description of the objectives that have been identified to improve quality of services and care in your hospital. This section describes the specific aims, measures and change ideas that form the core of the plan. You should also indicate how resources will be used to ensure that the correct financial levers are in place to execute the activities listed in your QIP]

Continuous Quality Improvement is a method that evaluates and continuously improves the caliber of care and service delivered from a patient perspective. Continuous quality improvement embraces quality by focusing on continuous process improvement, teamwork, staff and patient empowerment.

Each Member of the senior administration team will work with his/her departments to have defined improvement targets and initiatives related to the strategic priorities. The model for improvement used to effectively analyze and implement change will be the "Plan, Do, Study, Act" (PDSA) model.

Aims and Measures:

Quality Care- Safety

- Improve hand hygiene compliance by 8% before patient contact

System Integration/Financial Performance - Effectiveness

- Keep total margin at 1.00% for the organization to maintain a balanced financial position

Strength in People - Access

- Maintain emergency department wait times at 7.5 hours for patients with complex needs

Quality Care - Patient/Centered

- Patients in the emergency department will report that they would recommend hospital to family/friends 75% of the time

3. How the plan aligns with the other planning processes

[An explanation of how this document links to the other planning documents developed by your organization (such as H-SAA) and key external partners such as the LHIN and CCACs.]

The strategic priorities and quality improvement initiatives for the Renfrew Victoria Hospital align with the strategic directions of the Champlain LHIN specifically related to improving the health of Champlain residents and improving their experience with the health system. The four key initiatives provide a balanced approach to infection control, financial stability, wait times and patient satisfaction and will provide key directions for the hospital to follow.

4. Challenges, risks and mitigation strategies

[This section describes the relative risks that may inhibit the accomplishment of the objectives and the mitigating strategies that have been identified to lower those risks.]

The biggest challenge to implementation of accomplishments will be two-fold. First, the aging population crisis continues and even with new programs and services being developed, we may not be able to keep up with the demand for service which could potentially increase our emergency department wait times. Second, RVH continues to experience occupancy and bed pressures on a regular basis which results in back logs within our emergency department of admitted patients.

A capital project for an expansion of our nephrology program continues to be a dire need for the hospital. This proposal was submitted over two years ago and identified as a priority project from the LHIN perspective and also the Ontario Renal Network. This is required to enhance infection control practices across the hospital and would allow us to set up more hand washing stations potentially resulting in increased compliance with hand hygiene. Crowded environments make it difficult to set up point of care products appropriately in all areas of the hospital.

Financial targets will be challenging to meet if no increases in funding are provided to the hospital in the 2011/12 year.

Salaries for unionized employees continue to rise and RVH is waiting on the results of a CUPE arbitration related to salaries to truly know financial challenges for the coming fiscal year.

Many of the core outcomes/measures do not apply to RVH as volumes are too low to see statistically significant differences. These include hospital standardized mortality rate, ventilator associated pneumonia and central line blood stream infections. As a Level 2 ICU, patients are only ventilated short term and central lines are rare as part of the care in this area.

Part B: Our Improvement Targets and Initiatives

Please complete the "Improvement Targets and Initiatives – Part B" spreadsheet (Excel file). Please remember to include the spreadsheet (Excel file) as part of the QIP Short Form package for submission to the OHQC (QIP@ohqc.ca), and to include a link to this material on your hospital's website.

[Please see the QIP Guidance Document for more information on completing this section.]

Part C: The Link to Performance-based Compensation of Our Executives

Purpose of Performance-based compensation:

1. To drive performance and improve quality care
2. To establish clear performance expectations
3. To create clarity about expected outcomes
4. To ensure consistency in application of the performance incentive
5. To drive transparency in the performance incentive process
6. To drive accountability of the team to deliver on the Quality Improvement Plan
7. To enable team work and a shared purpose

Please refer to Appendix E in the QIP Guidance Document for more information on completing this section of the QIP Short Form.

Manner in and extent to which compensation of our executives is tied to achievement of targets

[Compensation should be linked to targets for those members of the senior management group who report directly to the CEO, including the chief of staff (where there is one) and the chief nursing executive. Please refer to the regulation (Ontario Regulation 444/10)]

Our executives' compensation is linked to performance in the following way:

Two percentage of compensation for executives (define CEO, Chief of Staff, VP Patient Care Services/Chief Nursing Officer, VP Corporate Services, VP Financial Services) is linked to achieving the following indicators:

- Hand Hygiene
- Financial Health
- Emergency Department wait times for complex conditions; and
- Patient satisfaction in the Emergency Department

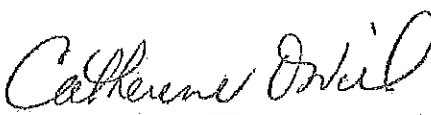

Refer to Part B of the QIP for specific performance targets for 2011/12.

Part D: Accountability Sign-off

[Please see the QIP Guidance Document for more information on completing this section.]

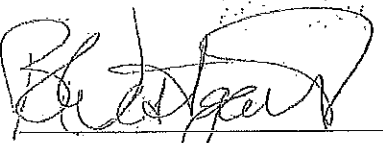

I have reviewed and approved our hospital's Quality Improvement Plan and attest that our organization fulfills the requirements of the *Excellent Care for All Act*. In particular, our hospital's Quality Improvement Plan:

1. Was developed with consideration of data from the patient relations process, patient and employee/provider surveys, aggregated critical incident data, and patient safety indicators;
2. Contains annual performance improvement targets, and justification for these targets;
3. Describes the manner in and extent to which, executive compensation is tied to achievement of QIP targets; and
4. Was reviewed as part of the planning submission process and is aligned with the organization's operational planning.

EXCERPT FROM MINUTES

**MINUTES OF THE REGULAR MEETING OF THE RENFREW
VICTORIA HOSPITAL BOARD OF DIRECTORS HELD ON
THURSDAY, MARCH 24, 2011 AT 19:00 HOURS**

- **EFCC EXCELLENCE IN CARE FOR ALL ACT** - The health care system is playing a vital role in improving health care services for Ontarians by working toward new standards set out in the *Excellent Care for All Act*, which became law in June of 2010. Renfrew Victoria Hospital continues to demonstrate enhanced efforts to increase quality, accountability and transparency.

The Quality Improvement Plan (QIP) is a key component of the Excellent Care For All Act, 2010 (ECFAA). The QIP is intended to outline an organization's priorities for quality improvement and articulate a strategy for implementation.

Beginning April 1, 2011 and every fiscal year thereafter, health care organizations are required to develop and publicly post a QIP. Under the legislation, a copy of the QIP will also need to be shared with the Ontario Health Quality Council (QHQC).

THE FOLLOWING EXECUTIVE COMPENSATION PLAN WAS PRESENTED TO THE BOARD FOR 2011-2012:

The "executives" included in the Executive Compensation Plan at RVH are the President & CEO, Chief of Staff, Vice-President of Corporation Services, Vice-President of Financial Services and the Vice-President of Patient Care Services.

In 2011-2012, 2% of compensation for the above listed executives will be linked to achieve the performance targets set out in our QIP for the following objectives: hand hygiene; financial health, emergency department wait times for complex conditions and patient satisfaction in the emergency department.

After detailed discussions it was resolved that the Executive Compensation Plan be approved. It was also noted that the Hospital would monitor the activities of other hospitals to make sure we are in line with other plans before publicly posting on the hospital website on April 1, 2011.
